

6 STEPS

TO CHOOSING THE RIGHT VANITY

WWW.RECYCLEDTIMBERFURNITUREOZ.COM

WHY US?

Understanding the 6 steps to choosing the right vanity builder will no doubt save you money, time & improve the value of your bathroom.

1. UNDERSTANDING WATER

Your vanity will be subject to water. Unless your vanity is finished with the correct oil, paint, sealer it will **ROT!**

2. DRAWER DURABILITY

Don't buy cheap rubbish. Our drawer runners are made to last at least 50,000 open and closes. Be careful because quality does cost money but less expensive than replacing poor quality.

3. HARDWOOD ONLY

Your vanity will be subject to water. Sounds silly however it is a fact that only hardwood stands the test of time with water. If it has melamine, chipboard or just anything not hardwood it **WILL** rot and expand!

4. RECYCLED SUSTAINABILITY

Like adding to a sustainable future. We offer recycled timber that is ready for a new life, has a story behind it & looks amazing.

5. CUSTOMISE TO YOUR NEEDS

We do not build stock. We only build to the design of the client. When you purchase from a shop that has stock you are buying what they need to sell. With us you are buying what you want.

6. LIFETIME WARRANTY

To compare us correctly ask our opposition if they offer a lifetime warranty. The only way you can offer this is if you build with **ALL** the right equipment, timber & finishes. If you are not purchasing from us this is the most important question you **NEED** to ask.
